

## Off-Site Regional Command

Created 10/09

Key to this plan is the regional-scaled management of all available fire service resources. Activation of the Plan embodies the manning of a Regional ESF-4 Coordination Center commensurate with the scope of the emergency.

### Simple Activation (single regional resources requested by Command)

- One Fire Coordinator at the scene
  - Assist Command with finding necessary resources
  - Keep Regional ESF-4 Chair advised of incident status
- One Fire Coordinator in the Incident Dispatch Center
  - Advise dispatchers regarding available resources
  - Assure coverage for region is properly handled

### Advanced Activation (significant regional resources activated; some inter-regional resources in use)

- In addition to the above, a Regional ESF-4 Coordination Center shall be established, manned with the ESF-4 Chair and several Fire Coordinators
  - Maintain contact (for situational awareness) with above-positioned Fire Coordinators
  - Maintain awareness of status of all regional assets
  - Advise Region V Director on incident status
  - Advise State ESF-4 Director on incident status

### Major Activation (large-scale incident requiring use of assets from multiple regions)

- Fully-staffed ESF-4 Coordination Center shall perform the following:
  - Advise Regional Emergency Manager on ESF-4 status
  - Coordinate fire service resources shared to/requested from other Regions
  - Advise State EOC on incident status
  - Coordinate with other ESF coordination efforts
